Here's What People Are Saying About AutoCAD... "We tried using 2D drafting software before Autodesk released AutoCAD, and we ended up redesigning the drawings in a software called CADWorx. We have since adopted AutoCAD as the standard for our company." - Ryan H. "For our company, it's difficult to imagine using another software in our daily work. I can tell you that our company has reduced development costs and increased the quality of our drawings and products." - Robert P. "When my son, Wayne, was in the eighth grade, he asked me for a job to help with his math homework. I gave him a list of items and told him to take a look at it and tell me how much it would cost. He came up with a cost that was pretty close, but it was well over the amount I told him to spend. I asked him why, and he told me that he had used AutoCAD to do the calculations. I was impressed with his method." - Robert S. "I am a landscape architect, and I use AutoCAD. My first experience with AutoCAD was in the early 90's. It was the only CAD program I used. It was slow and hard to learn. I got over that and found it useful. I use it for my landscape architecture and engineering drawings. I use it because I am an engineer and architect by trade. It is the same for me as a carpenter. I use it as the primary method to work on my projects. I started using it over 20 years ago and it has changed a lot. We still use it because it is the best tool for the job at hand." - Robert A. "I have been using AutoCAD since 1990. I find that the program is flexible and functional, and it's easy to use. The basic drawing functions are easy to learn, and I have used them to do simple architectural drawings. However, I have mostly used them to draft simple drawings for architectural plans and the building process. I like the drawing feature of the program very much. I like the program to view the finished drawings in various ways. I also like that I can easily find all of the information that I need to know in the program. In the past, I found that I had to work harder and search more to find information that I needed. The program is very user friendly. It is a little slower than some of the
