Q: How to control the position of a background image? I have created a background image and a black image on a tkinter Frame. I have tried to add a scrollbar and to use the min/max width of the Frame. However, I cannot get the black image to move to the right of the screen. When I run the program, the black image appears at the top, and does not move down the screen as the tkinter window is resized.

Any ideas?

```
import tkinter
class GUI:
    def __init__(self, root):
        self.root = root
        self.root.title("3D GUI")
```

```
self.root.geometry('200x200') self.frame
    = tkinter.Frame(self.root)
self.frame.configure(background='black')
self.canvas = tkinter.Canvas(self.frame,
width=200, height=200) self.canvas.conf
    igure(background="blue")
self.canvas.grid(row=0, column=0,
sticky=tkinter.NSEW) self.black =
    tkinter.Frame(self.frame)
self.black.configure(background="black")
self.black.grid(row=1, column=0,
    sticky=tkinter.NSEW)
self.canvas.create_window(0, 0,
anchor=tkinter.NW, window=self.black)
self.root.geometry('300x300')
```
