application for Android. Who

wants to read a book with nothing but a few tiny letters or a lack of description of what's happening? New Scientist readers would be very likely to say no thanks. "The science of this book is worth reading as a comment on how dangerous academia, unchecked by valid procedures, can become," writes Michael Shermer in the introduction. He

continues to say
“unchecked” science is
dangerous. But then he
writes: “While we may not
get everything right, no
organized religion has ever
gotten everything wrong.”
Sure, science is a process but
religion? Isn’t that just
saying “God did it” in
response to questions that
are unanswered? First,
“Biology’s First Law,”

“Biology’s First, First Law,”
“Biology’s First Law,” “The
First Law of
Thermodynamics” and “The
First Law of
Thermodynamics,” and “The
First Law of
Thermodynamics.” The
science behind this book
doesn’t even make sense. It
uses words like “life” and
“energy” and “evolution” in
the same sentence without

explaining what those words mean. While he does refer to Darwin's theories repeatedly, he never really explains what the theories are. Which is fine, but you don't have to understand science to appreciate a good story. Shermer's occasional references to modern biology are even more mystifying, as are the scientific explanations of

miracles. When things happen, you need to have an explanation. When your kid stops speaking, you don't get a full-fledged explanation of the mind of God – you get faith. I'm not the only
