What's New In?

Custom software management in Windows has never been easier! PMS Manager is an easy-to-use, yet powerful utility to simplify managing your application licenses and software keys across multiple computers. PMS Manager is a third-party application that allows you to manage all of your programs and their keys. You can make and delete user licenses, and manage your software keys to make sure that everyone has a valid license. A key benefit of using PMS Manager is that you can easily manage your software licenses across multiple computers, and when a license key expires, you will be able to update its value automatically. If you are a software developer, PMS Manager allows you to manage your program keys to make sure that everyone has a valid license. PMS Manager is the easiest way to manage your licenses. It will simplify your job to just one small application. Please note: PMS Manager is a Windows application. It does not require Microsoft Windows. Main Features: Remove invalid keys and users from installed applications Manage any number of licenses across multiple computers Manage your software keys and licenses across multiple computers Create, edit and delete user licenses and software keys Import and export licenses and keys Automatically update license keys with their values when needed Import license files from remote servers Support multiple projects Search, filter and sort user licenses and keys Manage licenses and keys across computers License and key information can be displayed in a table, a list or a chart Help files are included in the download package Description: The Action!Time Tracker PRO is a multifunctional time and project tracking software that will be able to record, track and manage your work time and work projects. The application offers an intuitive user interface and provides you with a variety of useful features. For example, you can: * Create time entries and modify them anytime during the day or night * See who you worked with and what they did * Create categories, track time, and attach a file or other documents * Customize the interface with the help of skins and configure it to your needs * Record phone calls, send and receive SMS messages * Add milestones and track the progress of your work and projects * Keep and analyze logs, create reports and export them as PDF or Excel files The application is light-weight and provides an interface that is intuitive and easy to use. It runs on Windows 2000/XP/Vista/7. Main features The application provides you with the following functionalities: * Create time entries with notes and modify them anytime during the day or night. * Track time with the help of categories, attach a file or other documents and add notes. * Record phone calls, send and receive SMS messages. * Customize the interface with the help of skins. * Analyze logs, create reports and export them as PDF or Excel files. Requirements The Action!
