Simply open the user guide and follow the on-screen steps to add or remove contact groups, filters or messages from your active data sources. To learn more about this software, please visit the SpamScan Technical Support Web site. Use the powerful, yet easy to understand Spam Filter Spam Filter. Protect your inbox from junk mail with Spam Filter. Easily detect spam by looking for misspellings, emails with URL's and/or attachments, or by using a built-in e-mail scanner. Works with all e-mail programs, including Outlook, Outlook Express, Eudora, Pegasus, Mail, and more. Whether you want to filter your messages from the Internet or detect spam in your own mail, Spam Filter is your solution. The Spam Filter e-mail scanner is an advanced electronic junk mail scanner. It detects both the content of an e-mail and a certain characteristic of that e-mail, such as the common question word, "What is this?" or common subject line. You can pre-define any keywords you wish and create your own filter to instantly delete them. You can filter an e-mail by its date/time, sender, and/or recipient. Spam Filter will filter an e-mail as soon as you delete it. You can even delete spam e-mails immediately, saving you a lot of time and disk space. Choose which e-mail accounts to monitor Monitor e-mail from selected accounts, or all your accounts at once. You can also monitor e-mail from multiple mailboxes at once. Protect your inbox from unwanted and spam e-mail Spam Filter looks for common characteristics in messages, such as known spam words, phrases, or attachments. You can even use built-in e-mail scanner to instantly detect spam e-mails. Use any keyword to protect your inbox Use any keyword you want to protect your

### What's New In?

Tired of the false positives in Outlook? How often is your Outlook Spam folder full of e-mails, and which e-mail you actually want to keep? It's time to take a more efficient approach. Spam Reader is the solution. The Spam Reader plugin for Outlook automatically marks the junk and spam messages in your Outlook Spam folder, and is able to distinguish between the two. The developed detection methodology is a combination of traditional spam detection and the Bayesian algorithm. This means that Spam Reader applies a Bayesian filter, using an extended database of known spam e-mails to identify spam messages. What does Spam Reader do? Spam Reader marks the spam messages as read. If the unwanted e-mail contains attachments, Spam Reader puts them into the trash. If Spam Reader detects contents like "This message contains viruses," or if Spam Reader determines that the e-mail is legit, Spam Reader puts the message into the desired folder.
