Genital self-mutilation in young people is a growing problem in the United Kingdom. This is the first report of an analysis of four cases of genital self-mutilation investigated by the Scottish Youth Justice Service during a 5-month period. The majority of individuals who have experienced self-mutilation to the penis or vagina were referred by their GP in the last 12 months of 1998 and reported a single event. In all four cases, the majority of individuals referred were at risk of some form of harm to themselves. The current literature and policies surrounding management of individuals self-mutilating their genitals 3e33713323
