The new “HyperMotion” engine is used by FIFA to bring faster gameplay, more finesse and better ball control to your player’s movements on the pitch. “We’re now able to get an even better performance,” said Eric Chahi, Co-Founder and Creative Director at EA SPORTS. “You’re now controlling a player on a more realistic level.” The new engine’s extensive suite of motion capture tools will also enable even more realism with player animations and gameplay. The physics engine for the FIFA engine is being heavily upgraded and will feature more intelligent animations, more realistic player movement, more realistic collisions and more responsive ball physics. The Hybrid Player Model animation will also feature tighter body controls, more responsive controls and smoother movements. The “HyperMotion” engine will also add more precision and responsiveness to player and ball movements. If you’re good enough to hold the ball with your foot, you’ll hold it better. This new engine has improved and more realistic control of your player’s speed, acceleration, handling, and more. For the first time, the player will be able to accelerate in a burst while being able to stick/tackle the ball. The overall ball control will be more precise, responsive and more accurate. It will also have more responsive touch controls. The new “HyperMotion” engine includes:

- More intelligent animations: More responsive, precise and accurate movements from the player, including over-the-head / head spinning, improved batting/throwing, bouncy movements and more realistic reactions to strikes, tackles, aerial duels, etc.
- More realistic player movement: Improved player speed, acceleration, handling, turning movements, more realistic acceleration while dribbling, more precise and responsive dodges, more realistic bamboozling on the ground and more realistic counter-striking movements, etc.
- More responsive touch controls: Improved responses and sensing for your player’s shot, pass and throw accuracy on foot and on the ball, greater responsiveness when heading the ball, better sense of direction and more dynamic reactions to strikes, tackles, aerial duels, etc.
- More realistic ball physics: Improved responsiveness and accuracy of movements, more realistic physical properties of the ball, responsiveness and accuracy of the bounce, more aggressive touches, etc.

## **Features Key:**

- Live out your dreams as both a manager and a player. Create the newest club in FIFA, design your kits, style your stadium, and choose whether to compete with the elite or rise up from the lower divisions as you manage your club to glory.
- Become a manager, starting your career at the age of 18, making use of your abundant potential to build and enhance your squad.
- Clifford se moves up FUT style from FIFA World Cup ‘98 and gain an insight

into all the different ways the level of physicality is complimented by a combination of gameplay.

- More ways to progress and achieve: earn more Pro Evolution Soccer experience points by playing Pro Clubs, compete in a new 'online challenges' mode and earn XP at team level by earning goals, assists and successful tackles.
- Pick up the ball and run: dribble your way through tight defences and pass the ball forwards and backwards to create space – all at top speeds.
- Get physical: tackle opponents, clear rebounds and keep the ball in possession with control passes.
- Short, stable passes: more realistic passes than ever before, with a host of new tools, including sharper visuals, finger-tip passes, high speed ball control, cleaner offside signalling.
- Improved ball physics: more accurate and responsive ball movement.
- New ways to experience goalmouth action: there are dozens of new off-the-ball behaviours including boot-ups, chip-kicks, seesaws, flicks and slide-ins from the last defender, letting your player chip the ball to a team-mate
- Introducing legendary World Cup star Hernan Crespo. The Spanish striker-turned-manager will play just like his Real Madrid and Argentina teammates, with world class finishing, a fluid personality and a unique shooting style.
- Game length - in fairness, we hoped this would be the feature that would be responsible for All In One's purchase.
- AI Engine Quality/Smoothness - All In One's purchase will be based around their devotion to also creating better AI.
- Visuals - The art and development team were working to raise the game's visual standards from FIFA 17.
