The Microsoft Windows 7 Service Pack 1 software installer is.. ae178093b8 WinRAR 5.40 no key Activator v2 Total Reimage Repair 10.0.14551. Activation.Q: Regex escape special characters in java I have a multiline regex in a string literal, which looks like this: String str = "blablabla foo bar; My name is bob."; Pattern p = Pattern.compile("^.*\{\{\(\\\\w{1,3}\)\}\\}.*"); Matcher m = p.matcher(str); while(m.find()) { System.out.println(m.group(1)); } I get the output foo, bob, but what I would like to see is foo, bob. I.e. the regex can't match if it finds a ';' - so I need to escape it. I can do String str = "blablabla foo bar; My name is bob. "; Pattern p = Pattern.compile("^.*\{\{\(\\\\w{1,3}\)\}\\}.*"); Matcher m = p.matcher(str); while(m.find()) { System.out.println(m.group(1)); } as I know I can do that, but I don't want the extra line break. So I need to find a way to escape the " character in the regex without having to escape all the special characters in the string at the same time. Is it possible? Thank you. A: Try this: \{(.*)\([;, \.]\)*\?:\\\\{(.*)\([;, \.]\)*\?:(?:\?:\\\\{(.*)\([;, \.]\) d0c515b9f4
